PROFESSIONAL SUMMARY

Full-time MBA candidate at Santa Clara University's Leavey School of Business with 5+ years of experience spanning banking, financial and operational analysis, project leadership, product delivery, and enterprise systems. Experience includes credit and risk workflows, SME and retail banking strategy, financial reporting, process transformation, and technology-enabled operating models. Research portfolio spans investment banking strategy, market microstructure, equity factors, financial feasibility, audit analytics, marketing ROI, cloud economics, cybersecurity, and commercial project leadership.

EDUCATION

Santa Clara University, Leavey School of Business Santa Clara, CA <i>Master of Business Administration (Full-Time MBA)</i>	Aug 2026 – Present
Stevens Institute of Technology Hoboken, NJ <i>Master of Engineering, Engineering Management </i>	2021 – 2022
SRM Institute of Science and Technology Chennai, India <i>Bachelor of Technology, Electronics & Communication Engineering</i>	2017 – 2021

PROFESSIONAL EXPERIENCE

ONS Tech ONS Hospitality Group Senior Project Manager Promoted after three months (Sep 2025 – Aug 2026); Project Manager (Jun 2025 – Aug 2025) • Led cross-functional delivery across ONS's technology and financial division, translating hospitality operating requirements into backend financial workflows and integrated technology capabilities. • Managed development of in-house point-of-sale and inventory-management systems, defining requirements for transaction capture, purchasing, stock movement, reconciliation, controls, and management reporting. • Directed requirements analysis, process mapping, testing, issue resolution, release coordination, and stakeholder communication across POS, inventory, financial reporting, and internal technology initiatives. • Connected operating processes with financial and management-reporting needs, helping create more structured workflows for transaction visibility, inventory control, reconciliation, and decision support.	Jun 2025 – Aug 2026
ABS Tech Dallas, TX Project Coordinator Promoted from Senior Business Systems Analyst • Led cross-functional design and delivery of an automated payroll platform spanning contractor billing, salaried pay, overtime, incentives, deductions, exception handling, and compliance, reducing processing effort by 70%+. • Translated payroll policies and operating requirements into system-driven workflows and validation controls while coordinating engineering, finance, HR, compliance, and business stakeholders. • Built SQL reporting and Tableau dashboards to improve leadership visibility into operating performance, risk, exceptions, and management decision-making. • Directed AS-IS/TO-BE analysis, requirements prioritization, sprint coordination, UAT, issue resolution, and release execution for enterprise process and system enhancements.	Feb 2024 – May 2025
Carelon Behavioral Health / Randstad USA Dallas, TX Senior Business Systems Analyst • Conducted financial and operating analysis identifying \$2M in cost-saving opportunities and strengthened executive decision support through structured performance and risk analysis. • Streamlined financial reporting processes, reducing reporting-cycle time by 20% and improving the timeliness and usability of management information. • Applied predictive and portfolio analytics to evaluate risk-adjusted performance, supporting initiatives associated with a 10% improvement in modeled ROI. • Supported enterprise risk-management and process-improvement initiatives by translating business needs into analytical, reporting, and system requirements.	Feb 2023 – Dec 2023
Amazing Vitamins LLC Carlstadt, NJ Product Analyst • Analyzed operating and healthcare datasets using Python and SAS, developed KPI reporting, and translated analytical findings into process and product improvement priorities. • Partnered with stakeholders to define performance measures and improve management visibility through structured dashboards and recurring analysis. • Led process and system enhancements that reduced billing errors by 15% while strengthening operational consistency, data quality, and reporting.	Jan 2022 – Jan 2023
Equitas Small Finance Bank Chennai, India Strategic Manager • Developed branch and product growth strategy using market segmentation, contributing to a 20% increase in SME and retail lending portfolios and an 18% increase in customer acquisition. • Enhanced credit underwriting and risk-management processes, reducing non-performing assets by 12% while balancing portfolio growth, regulatory requirements, and financial sustainability. • Worked across lending, digital banking, operations, and strategy priorities to improve customer acquisition, credit discipline, and execution of growth initiatives.	Mar 2020 – Mar 2021

- **Universal Ambition: Recasting SPD's Investment Banking Playbook for Scale and Risk Discipline** — Analyzed Shanghai Pudong Development Bank's universal-banking strategy, multi-year financial disclosures, ECM/DCM and cross-border platforms, fee-income diversification, and risk governance.
- **Silent Auctions at the Close: How Mandate Transparency and Hedging Opacity Distort End-of-Day Price Formation** — Examined how transparent leveraged-ETF rebalancing and opaque options-market-maker hedging affect closing-auction liquidity, momentum, reversals, market efficiency, and arbitrage potential.
- **Volatility Pathways and the Regime Sensitivity of Equity Factors** — Studied momentum, value, quality, and low-risk factor behavior across multi-scale volatility paths, focusing on regime-dependent returns, crash risk, drawdowns, turnover, and state-conditioned exposure.
- **Financial Feasibility and Operational Value Realization of Cloud-Native ERP Implementation: ROI Analysis and Multi-Dimension Business Benefit Measurement in Telecom Infrastructure Services** — Evaluated cloud-ERP investment feasibility using financial-statement analysis, cost-benefit methodology, NPV/ROI/payback logic, and multidimensional operating-benefit measurement.
- **Haptic Mapping for Financial Data Integrity Assurance** — Developed a layered audit-analytics framework that maps ERP transaction flows from journal-entry activity to consolidated financial-statement impacts, integrating controls, materiality, resources, and system interactions.
- **Probabilistic Channel Attribution via Stacked Inference: Leveraging Temporal Dynamics and Creative Intelligence for Optimal Marketing Budget Reallocation** — Developed a Bayesian marketing-mix framework combining carryover, saturation, time-varying effectiveness, semantic creative features, and constrained optimization to quantify ROI and recommend budget allocation.
- **A Declarative Benchmarking Framework for Cloud Service Efficiency Using Resource Orchestration Simulation** — Designed a model-driven benchmarking approach for cloud-service economics, testing resource density, failover risk, quality of service, and capital-efficiency trade-offs using production-derived workload behavior.
- **Collaborative Cloud Threat Hunting: A Federated, Privacy-Preserving Security Analytics Framework** — Proposed a federated multi-cloud threat-hunting architecture combining anomaly detection, secure model aggregation, encrypted updates, and differential privacy to improve cross-environment detection without centralizing raw logs.
- **The Hybrid Manager in Construction: Integrating Financial Acumen and Strategic Foresight in Project-Based Enterprises** — Examined commercial-management competencies at the intersection of engineering and finance, emphasizing cash-flow stewardship, procurement strategy, risk intelligence, negotiation, and profit-oriented project leadership.
- **Beyond Technical Delivery: Integrating Commercial Strategy into the Core of Capital Project Leadership** — Analyzed how contract governance, commercial foresight, profitability, external partnerships, and strategic alignment can be embedded into capital-project leadership and engineering-management practice.

SKILLS & CAPABILITIES

Financial Management & Corporate Finance: Financial statement analysis; financial reporting; cost-benefit and financial feasibility analysis; ROI, NPV and payback analysis; profitability analysis; capital allocation; KPI and management reporting; investment evaluation; risk-adjusted performance.

Banking, Credit & Risk: SME and retail lending; credit underwriting; credit risk analysis; credit portfolio quality; non-performing asset analysis; banking and lending strategy; market segmentation; customer acquisition; risk frameworks.

Investment Banking & Capital Markets: Investment banking strategy; ECM/DCM research; cross-border and universal banking; capital markets research; market microstructure; equity-factor and volatility-regime research; portfolio risk; industry and competitive research; DCF valuation; comparable company analysis; precedent transaction analysis; three-statement modeling; LBO and M&A modeling; accretion/dilution analysis; enterprise and equity valuation; capital structure; forecasting and sensitivity analysis.

Strategy, Product & Transformation: Business strategy; business transformation; product strategy; business cases; AS-IS/TO-BE and gap analysis; process redesign; workflow design; operating-model improvement; requirements prioritization; decision support.

Data, Analytics & Technology: Microsoft Excel; SQL; Tableau; Python; SAS; statistical and predictive analytics; portfolio analytics; KPI dashboards; data visualization; quantitative and qualitative research; business intelligence.

Enterprise Systems & Automation: ERP and cloud-native systems; POS and inventory systems; payroll automation; financial workflows; reconciliation; transaction capture; validation controls; exception handling; enterprise reporting; data governance.

Leadership, Communication & Research: Executive presentations; stakeholder communication; cross-functional facilitation; requirements documentation; financial and technical research writing; analytical problem-solving; strategic thinking; team leadership.

Project & Program Management: Project leadership; cross-functional delivery; stakeholder management; Agile/Scrum; sprint planning; scope and dependency management; process mapping; UAT; testing and release coordination; issue resolution; implementation management.

LEADERSHIP & CERTIFICATIONS

Leadership: Committee Member, Young Professionals - Dallas Regional Chamber; Event Coordinator - Dallas Business Club; Volunteer, Professional Development Programs - Dallas Association for Financial Professionals.

Certifications: Product Manager Certificate - Product School; Product Leader Certificate - Product School; Product Marketing Manager Certificate - Product School; Scrum Master Certificate - Scrum Institute; Six Sigma Green Belt.
